

FREE EVOLVE Manual Pipette

with any purchase of VIAFLO II or
VOYAGER II electronic pipettes!

- Featuring three dials for setting each individual volume digit. This approach allows users to set volumes more than ten times faster!
- Two different plunger springs allow users to customize the force needed to depress the plunger to their preference. This option allows users to slow the speed of aspiration and dispense resulting in improved pipetting technique and pipetting results.
- GripTips pipette tips snap into place with minimal tip loading effort, providing a secure connection. GripTips never fall off and are perfectly aligned, resulting in superior accuracy and precision.
- The INTEGRA linear stand is ideal for hanging INTEGRA manual and electronic pipettes up off the lab bench. Users can add up to four charging / communication stations to convert the INTEGRA linear stand into a charging option.
