1 Introduction

This document describes installation and connection of the LINX inkjet printhead (bottom print) to the MEDIAJET (MJ) dish filler. The following LINX types are supported:

- LINX 4900 (discontinued), printhead MK7
- LINX 5900 (discontinued), printhead MK7
- LINX CJ400 (discontinued), printhead MK11
- LINX 89xx, printhead MK11

Before starting with the installation, please carefully read MJ and LINX operating instructions. Please note that MJ units manufactured before May/June 2010 (serial numbers below 10310372/11310129) are not compatible with LINX inkjet printers for bottom print. Connection kits manufactured before May 2019 are not compatible with printhead MK11.

2 Required Accessories and Documentation

The components listed below are required to connect the inkjet printer to MEDIAJET.

Components available from INTEGRA Biosciences:

- MEDIAJET Dish Filler (Part no. 103005/103006/113000/113001/113002)
- MJ Operating Instructions (Part no. 103950)
- Connection kit (Part no. 113840) for LINX (bottom print), consisting of:
  1. Flange
  2. Disc without or with slot
  3. Hexagon screw M5x16 (3x)
  4. Screw cap (2x)
  5. Tube
  6. Interface cable MJ to LINX (113853)

This instructions for installation.
3  Mount printhead onto MEDIAJET

Remove the two plastic screw caps and remove the dummy cover on the rotor slide plate.

Install the new disc with slot (2). Cover the screws with the screw caps (4).

Dismantle the bottom plate of the MEDIAJET.

The slot position of the MK11 printhead is slightly offset compared to the MK7.

Mount the flange (1) on the tube (5), so that the slots of the disc (2) and the printhead fit on top of each other. The tube with the flange must be mounted with 3 Hexagon screws M5x16mm (3) at the correct position in the slotted hole of the flange:

<tr>
<th>Printhead MK7</th>
<th>Printhead MK11</th>
</tr>
</thead>
<tbody>
<tr>
<td>Offset</td>
<td>Offset</td>
</tr>
<tr>
<td>Counterclockwise (ccw)</td>
<td>Clockwise (cw)</td>
</tr>
</tbody>
</table>

**Note:** Please mind the positioning of the tube.
Remove the round pre-cut part from the bottom plate.

Remount the bottom plate.

Hang the printhead in the tube (5), it is held in the correct position by its screw:

<table>
<thead>
<tr>
<th>Printhead MK7</th>
<th>Printhead MK11</th>
</tr>
</thead>
<tbody>
<tr>
<td>Upper position</td>
<td>Lower position</td>
</tr>
</tbody>
</table>

Connect the LINX printer with the MEDIAJET using the interface cable provided.

In the service level menu under item **22 Inkjet printer head position** select **BOTTOM**:
