1 Introduction

1.1 Intended use

The Linear Stand is used to hang up your INTEGRA Biosciences pipettes. The Charging Station and the Charging/Communication Station, here Charging Stations for short, are mounted on the Linear Stand (#3215) to charge VIAFLO/VOYAGER Electronic Pipettes from INTEGRA Biosciences. Using the Charging/Communication Station, the pipettes can be connected to VIALINK via a PC. VIALINK allows the user to upload/download custom programs, images, firmware updates and service history to and from VIAFLO and VOYAGER pipettes.

The Charging Stations have been designed for use in a laboratory. They shall be used in a dry and dust-free location with a temperature of 5–40 °C and a maximal (non-condensing) relative humidity of 80 %.

1.2 Safety notes

1) Do not use the Charging Stations in an atmosphere with danger of explosion.

2) Use an original INTEGRA Biosciences Mains Adapter (#3216) only.

3) Prolonged exposure of Charging Stations to UV-light can cause discoloration and/or yellowing of the plastic housing. This will not affect the performance of the device in any way.

Please visit our website www.integra-biosciences.com on a regular basis for up to date information regarding REACH classified chemicals contained in our products.

2 Installation

2.1 Assembling the Linear Stand

Push the upper ends of the two support feet into the connecting rail (a).
2.2 Mounting the Charging Stations

**Note:** The Charging Stations (#3217, #3218), Linear Stand (#3215) and Mains Adapter (#3216) must be ordered separately.

1) Take the Linear Stand (#3215) and pull one of the two support feet off the connecting rail.

2) Loosen the screw (b) on the Charging Station and slide the rectangular washer (c) of the Charging Station on the connecting rail.

3) Move the Charging Station to the desired position and tighten the screw. Up to 4 Charging Stations can be mounted to each linear stand.

4) Insert the plug (d) of mains adapter into the bottom of the removed support foot and guide it through the foot.

5) Pass the cable through the horizontal slot of the connecting rail.

6) Connect the plug (d) with the Charging Station.
7) Push the support foot back on the Linear Stand.
8) Connect the Charging Stations serially using the connection cable (e).
9) Insert the plug of the USB cable (f) into the socket of the Charging/Communication Station, if applicable.

3 Disposal

The Linear Stand can be disposed of with municipal waste. The Charging Stations and the Mains Adapter must not be disposed of with unsorted municipal waste. Do not dispose them in a fire.

Dispose of the Charging Stations and the Mains Adapter in accordance with the laws and regulations in your area governing disposal of devices.
