

This report summarizes the carbon footprint of INTEGRA Biosciences Holding AG (including the two production sites and all sales offices) for 2022 (Table 1). The carbon footprint is based on the internationally recognized standard 'The Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard' including climate-relevant greenhouse gases that are under the operational control of the company. The data for the calculations is taken from ecoinvent 3.6 (minimum boundary) and the IPCC 2013 methodology, where the greenhouse gas potential is considered over a time horizon of 100 years (GWP 100a). The total greenhouse gas emissions accounted for amount to 16'618 t CO₂e.

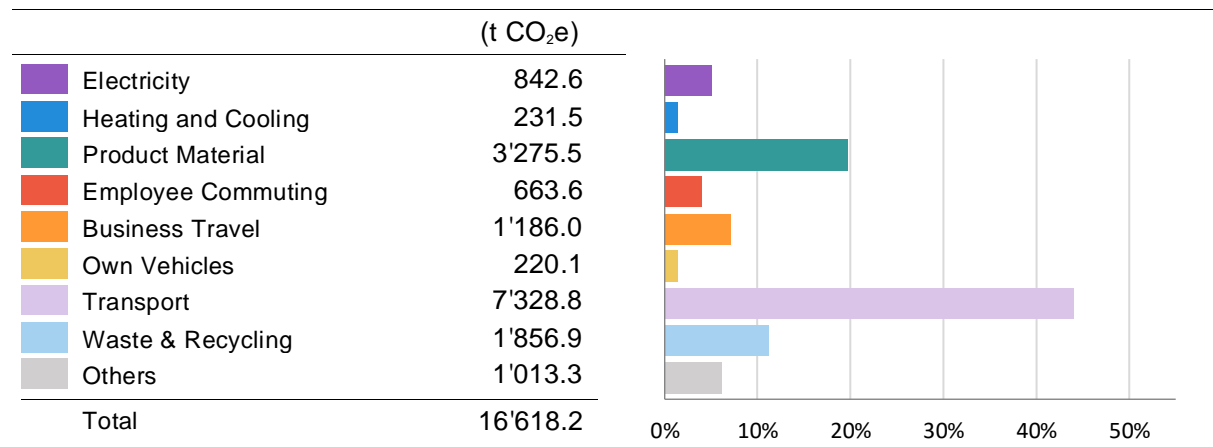

Table 1: Greenhouse gas emissions broken down into categories. Transport: procurement and distribution. Waste & Recycling: Generated in operations and end of life disposal. Others: Office and IT Materials, Investments, Food & Beverages.

Greenhouse gas emissions are assigned to three scopes as depicted below (Table 2). A distinction is made between where the emissions occur - at the company itself or in upstream or downstream processes for manufacturing and transporting goods:

Scope 1: includes all direct emissions from owned or controlled sources, such as business travels in company cars or the combustion of fuels in heating systems.

Scope 2: includes all indirect emissions from the production of purchased energy consumed by the company, for example from the burning of coal to produce electricity. If, for example, renewable energies are used to produce electricity, no emissions are reported here.

Scope 3: includes all other indirect emissions resulting from the production of raw materials, products or services used by the company and from business travels in vehicles not owned by the company.

Table 2: Greenhouse gas emissions divided into three scopes according to the GHG Protocol Standard.

Scope 3 emissions, i.e., emissions in our supply chain, account for 94% of our emissions.

Our 1.5 °C ambition, validated by SBTi

- INTEGRA Biosciences Holding AG commits to reduce absolute scope 1 and 2 GHG emissions 46.2% by 2031 from a 2021 base year.
- INTEGRA Biosciences Holding AG also commits to increase active annual sourcing of renewable electricity from 48% in 2021 to 100% by 2030.
- INTEGRA Biosciences Holding AG further commits to reduce scope 3 GHG emissions from purchased goods and services, fuel and energy related activities, upstream transportation & distribution, waste generated in operations, business travel, employee commuting, use of sold products, and end-of-life treatment of sold products 51.6% per million CHF value added by 2029 from a 2019 base year.

Environmental performance

| INTEGRA corporate GHG emissions (t CO ₂ e) | 2019 | 2020 | 2021 | 2022 |
|--|--------------|---------------|---------------|---------------|
| Scope 1 (t CO ₂ e) | 208 | 215 | 239 | 359 |
| Scope 2 (t CO ₂ e) | 498 | 737 | 792 | 694 |
| Scope 1+2 SBTi (t CO ₂ e) | 706 | 952 | 1'031 | 1'053 |
| Supply chain GHG emissions (t CO ₂ e) | 2019 | 2020 | 2021 | 2022 |
| 3.1 Purchased goods and services | 1'758 | 2'920 | 4'018 | 3'479 |
| 3.2 Capital goods | 719 | 969 | 875 | 630 |
| 3.3 Fuel- and energy-related activities | 136 | 176 | 221 | 241 |
| 3.4 Upstream transportation | 1'181 | 3'203 | 5'399 | 4'768 |
| 3.5 Waste generated in operation | 77 | 133 | 203 | 430 |
| 3.6 Business travel | 1'153 | 513 | 594 | 1'186 |
| 3.7 Employee commuting | 244 | 427 | 752 | 664 |
| 3.9 Downstream distribution | 1'514 | 2'761 | 2'263 | 2'561 |
| 3.11 Use of sold products | 125 | 151 | 172 | 179 |
| 3.12 End-of-life treatment | 702 | 1'347 | 1'913 | 1'479 |
| Total Scope 3 (t CO₂e) | 7'610 | 12'601 | 16'409 | 15'565 |
| Total Scope 3 SBTi (t CO₂e / Mio. CHF) | 92 | 84 | 86 | 79 |

Table 3: Environmental performance of categories.

■ Base year of categories essential to and influenceable by our operations that are included in the SBTi target (67% of scope 3 emission must be included in the SBTi target).

To achieve these ambitious targets, all production sites and sales offices are to obtain electricity from renewable sources and, where possible, be equipped with solar panels. We will gradually replace our fleet of company cars with electric cars, reduce air freight transport, launch a project to de-fossilize our plastic products and promote environmentally friendly traveling.

Electricity

| | 2019 | 2020 | 2021 | 2022 |
|--|-------|-------|-------|-------|
| Electricity total (MWh) | 1'754 | 2'510 | 3'316 | 3'125 |
| Electricity conventional (MWh) | 1'449 | 2'132 | 2'296 | 2'000 |
| Electricity photovoltaics (MWh) | 69 | 89 | 648 | 734 |
| Electricity per revenue (MWh / Mio. CHF) | 23.5 | 19.3 | 17.4 | 15.9 |
| Share renewable electricity (%) | 33 | 35 | 48 | 50 |

Table 4: Electricity consumption, efficiency and share of renewable.

The efficiency and the share of renewable electricity has been increased.
