

Electronic Pipettes, Microplate dispensers: MINI 96

MINI 96 – 96-channel portable electronic pipette

Product description:

The MINI 96 is the latest addition to INTEGRAs 96-channel electronic pipettes family. Now, 96 and 384 well plates can be filled faster and more precisely than using traditional handheld pipettes. MINI 96 is the world's most affordable 96-channel pipette. Its tiny size and portability allow the instrument to be easily moved anywhere in the lab from the laminar flow cabinet to small workspaces on any lab bench. For easy, precise and effortless targeting of microwell plates the up and down movements are motor assisted.

The MINI 96 is available in 4 volume ranges ranging from 0.5 – 12.5 μl , 5 – 125 μl , 10 – 300 μl and 50 – 1250 μl assuring all your applications are covered.

The MINI 96 benefits from the innovative GRIPTIPS system. The GRIPTIPS system features a unique tip fitting. Together with INTEGRAs GRIPTIPS this integral system guarantees tips will never fall off. Every single tip is individually sealed eliminating any cross-channel interactions.

Features and Benefits:

- MINI 96 portability allows to move the pipette anywhere – anytime.
- The family concept makes it the MINI 96 as easy to use as an electronic handheld pipette freeing staff from training.
- Massive increase in productivity for pipetting in 96 and 384 well plates versus traditional 8 and 12 channel pipettes.
- MINI 96 accommodates INTEGRAs GRIPTIPS which guarantee to never leak or fall off.
- Its high-resolution large colour screen lets the user see what's important.
- An optional Two Position Stage allows for filling partial plates, a few columns, or performing serial dilutions.
