

TRADE AGREEMENTS ACT COMPLIANCE STATEMENT

INTEGRA Biosciences is committed to provide reliable, high-quality products which are safe and compliant with relevant regulations worldwide. TAA refers to the U.S. Trade Agreements Act (19 U.S.C. & 2501-2581)

The Trade Agreements Act ("TAA") requires the United States ("U.S.") government to purchase end products manufactured or substantially transformed within the U.S. or a [TAA designated country](#). TAA compliant products make it possible for U.S. government agencies and educational institutions to do business with a U.S. based company like INTEGRA Biosciences Corp.

All INTEGRA Biosciences products are designed, manufactured, assembled, tested, and supported in the U.S. and TAA designated countries. INTEGRA Biosciences continuously checks the origin of components and parts of its products to ensure compliance.

The lab instruments and consumables listed below including their accessories have been deemed TAA compliant by INTEGRA Biosciences. This is not a fully inclusive list, as there are other INTEGRA Biosciences products that are TAA compliant but are not listed below. Please contact [INTEGRA Instrument Compliance](#) or [INTEGRA Consumable Compliance](#) if you need more information or if you don't find your product on the list.
