

Statement of Compliance with the Trade Agreements Act

INTEGRA Biosciences is committed to delivering reliable, high-quality products that meet the highest safety standards and comply with applicable international regulations. In accordance with the U.S. Trade Agreements Act (TAA), 19 U.S.C. & 2501-2581, we ensure that our products comply with the requirements of this law. This means that our products are either manufactured in the U.S. or in countries that are listed in relevant trade agreements with the United States, ensuring compliance and integrity in our supply chain.

The Trade Agreements Act ("TAA") requires the United States ("U.S.") government to purchase end products manufactured or substantially transformed within the U.S. or a [TAA designated country](#). TAA compliant products make it possible for U.S. government agencies and educational institutions to do business with a U.S. based company like INTEGRA Biosciences Corp.

All INTEGRA Biosciences products are designed, manufactured, assembled, tested, and supported in the U.S. and TAA designated countries. INTEGRA Biosciences continuously checks the origin of components and parts of its products to ensure compliance.

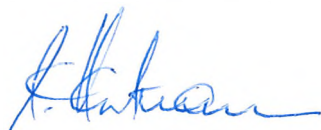

The lab instruments and consumables listed below including their accessories have been deemed TAA compliant by INTEGRA Biosciences. This is not a fully inclusive list, as there are other INTEGRA Biosciences products that are TAA compliant but are not listed below. Please contact [INTEGRA Instrument Compliance](#) or [INTEGRA Consumable Compliance](#) if you need more information or if you don't find your product on the list.

INTEGRA Instruments	
ASSIST	MINI 96
ASSIST PLUS	MIRO CANVAS
